BlackLineBoost

OPTIMIZE YOUR IMPLEMENTATION

SSF helps you maximize the benefits of your BlackLine investment by reviewing your implementation thoroughly to identify potential opportunities for improvement. In our free assessment, we'll compare your implementation to leading industry practices to help you get the most from BlackLine's powerful capabilities and automations.

We'll identify ways for you to utilize BlackLine more effectively and highlight the implications and potential risks of underutilized settings or tools within the platform. More importantly, you'll be better able to streamline your financial close and improve your controls environment while saving time and reducing costs.

OUR BLACKLINEBOOST PROCESS

How It Works

After a brief discussion, we'll run a series of analytics on your BlackLine instance that will provide key data indicators and insights into your settings, administration processes, usage, and overall adoption.

Summary of Findings Report

We'll then use these key indicators and our deep knowledge of best practices to provide you with a detailed understanding of your BlackLine implementation and potential improvements. We'll review each of the key areas with you and provide a Summary of Findings report outlining our recommendations for optimization.

You can use the report's guidance to implement these recommendations on your own, or, if you'd like to explore receiving assistance, we'll schedule a discovery call and provide a quote for our services.
