

## EVERY DECISION HAS AN IMPAKT: DO YOU KNOW YOUR IMPAKT IQ?

IMPAKT IQ IS THE LEADING ENTERPRISE LEVEL  
ESG INTELLIGENCE & REPORTING TOOL

Impakt IQ's ESG Tool Set and Impakt Score provides companies with a customized investor grade ESG framework, enabling insight into material risks, value creation opportunities, benchmarks & more.

Beginning in early 2024, the International Sustainability Standards Board (ISSB) will issue a global set of Environmental, Social and Governance (ESG) disclosure and reporting standards that will affect both public and private companies. These disclosure standards are in response to growing demand from stakeholders for more transparency, action and accountability on ESG issues that are deemed to have a material impact on a company's operations and financials. As a result, ESG has now become central to corporate strategy, profitability, and valuation. Yet, companies are challenged when navigating through this massive transition with fragmented ESG knowledge, a lack of critical insights, and no comprehensive tool bringing the puzzle pieces together. **WE CAN CHANGE THAT.**

### ESG Management Tool

The Impakt IQ methodology addresses your ESG blind spots and provides insight into your business' ESG impacts, allowing you to leverage this intelligence to make informed business decisions and embed impact into your business model.

Our approach helps inform and connect all leaders of an organization, creating cross functional awareness of ESG risks, opportunities, and value creation. It is a catalyst for organizational transformation by increasing ESG intelligence in alignment with the leading global frameworks, SASB and TCFD.

# ESG is increasingly becoming central to corporate strategy, long-term organizational resilience, profitability, and is a critical valuation measure.

The IIQ ESG Report is to ESG what a Financial Report is, relative to finance. It provides a single location for true holistic insight into critical financial and reputational risks, and value creation opportunities of your organization.

When viewed alongside the company's financial reports, the report provides clients with better insight into their organization's performance across industry specific ESG issues, disclosure topics, and category scores.
